ΠΕΡΙΓΡΑΜΜΑ ΜΑΘΗΜΑΤΟΣ (Course Syllabus)

1. General

School	School of Humanities and Social Sciences			
Department	Department of Culture, Creative Media and Industries			
Study Level	Undergraduate			
Course code	ΕΠ114	EΠ114 Semester 1st or 3rd		1st or 3rd
Course Title	Architecture and Urban Space			
Autonom	ous Teaching Activities Weekly Teaching Hours		Credits	
	Lectures and Tutorials		3	5
Course Type Υποβάθρου , Γενικών Γνώσεων, Επιστημονικής Περιοχής, Ανάπτυξης Δεξιοτήτων	Scientific are	ea		
Prerequisites:	No			
Course teaching and evaluation language:	Greek			
The course is offered to Erasmus incoming students	Yes			
Course Page (URL)				

2. Learning Outcomes

Learning Outcomes

Describe the learning outcomes of the course, the specific knowledge, skills and abilities students will acquire upon successful completion of the course of the appropriate level.

Understanding architecture as a creative industry.

Ability to analyze critically architectural projects of various historical periods.

Understanding of the social and historical context behind important architectural works.

General Skills

Taking into account the general competencies that the graduate must have acquired (as listed in the Diploma Supplement and listed below), which one (s) does the course aim for?

 $Research, analyze\ and\ synthesize\ data\ and\ information,\ using\ the\ necessary\ technologies$

Adaptation to new situations

. Decision making

Independent work

. Teamwork

 $Working\ in\ an\ international\ environment$

 $Working\ in\ an\ interdisciplinary\ environment$

Production of new research ideas Project design and management

 ${\it Respect for diversity and multiculturalism}$

 ${\it Respect for the \ natural \ environment}$

Demonstrate social, professional, and ethical responsibility and gender sensitivity

 ${\it Exercising\ criticism\ and\ self-criticism}$

Promoting free, creative, and inductive thinking

Research, analyze and synthesize data and information, using the necessary technologies. Independent work

Promoting free, creative and inductive thinking

Exercising criticism and self-criticism

3. Course Content

Architecture, from design through construction and dwelling to habitation, is centered on the

human being and the service of his/her basic needs: It is always related to cultural context that produces it. Because of its anthropocentric definition and within the contemporary capitalist economic system, architecture is also recognized as a cultural/creative industry. That is, its works are recognized as cultural, collective social capital.

The course will focus on two readings of the built environment: a) the cultural background of architecture b) the contribution of architecture to the creation of contemporary cultural phenomena within urban space. There are three thematic axes:

- Representation (museums, stadiums).
- Technology (modern housing, social housing, apartment building/skyscraper).
- Urban space (gentrification, tourism).

The course will try to answer questions such as:

- What exactly do sports architecture projects represent?
- How does museum architecture function as a carrier of meaning?
- How are museums connected to new forms of urbanization?
- How does technology influence architectural creation?
- What is "traditional" architecture about?
- What role does contemporary architecture play in urbanization, gentrification, and spatial inequalities?

The architectural examples to be analyzed in class belong to the history of Greek and European architecture (late 19th, 20 and 21th century).

4. Instructive and Learning Methods - Evaluation

Delivery Method.	Delivered by physical presence			
Use of IT's in teaching and	PowerPoint presentations			
communication with students	 Support Learning Process via the e-class platform 			
	 Electronic communication with students 			
Teaching Structure	Methods	Semester Work Load		
The methods of teaching are described in detail	Lectures and seminars	3*25		
The student study hours for each learning	Tutorials in smaller student			
activity are recorded as well as the non-	groups, that focus on			
instructional study hours so that the overall workload at semester level corresponds to ECTS	implementing the			
standards.	methodologies and case			
	studies			
	Individual/Team projects			
	Autonomous study	2*25		
	Course Total			
	(25 Hrs. Workload per	25*5=125		
	Credit Unit)			
Student Evaluation	Creare Giney			
Description of the evaluation procedure	The evaluation criteria are explicitly mentioned during the first			
	introductory lecture. They are also available, in the course			
	description on the university's eclass asynchronous e-learning			
	platform.			
	Final Written Exams: 100%			
	There will be found In the eclass documents:			
	 presentations (power point/pdf) 			
	 as well as relevant articles and book chapters for study, which will be discussed in class and 			
	will also be part of the material to be			

examined. • Students are encouraged to take notes in class.
